

Railway Museum Online Scavenger Hunt

How it Works:

-  Using the hints on the next pages, visit an assortment of Canadian railway museums online to solve the puzzles. Make sure to record your answers!
-  Learn something new? Amazed by something in a museum's collection? Share your adventures on social media and tag us!
-  Museums across Canada are participating! Check out their websites and find one closest to you to plan a future visit!

Clues:

1. Can you name the oldest electric radial railway car in **Halton County Radial Railway's collection?**
2. In this 1940 Dominion Atlantic Railway train order, where was train #95 to meet train #96? Nova Scotia's **Middleton Railway Museum and the Dominion Atlantic Railway Preservation Institute** can help find the answer.
3. The **Friends of Freeman Station** have a question for you: What is the exact Rail Distance in Miles between Chicago and Montreal (to 2 decimal places) through Burlington Junction, Ontario?
4. Where was the **South Simcoe Railway's** oldest locomotive built? When?
5. Calgary's **Heritage Park Historical Village** has two steam locomotives. They must fill up at this location each day before they can operate. Where do they need to fill up?
6. I live in a pit and turn trains around. Until 1984, I used to work downtown. Check out the **Central BC Railway and Forestry Museum** for my name!
7. The **Cranbrook History Centre** can help with the answer to this riddle:
*As you walk through me, you travel through time
Through wealth, through the choice of Winston Churchill, himself
The Queen, John and Jackie also found it sublime
Seven, altogether, but only one of myself
What am I?*

Clues:

8. The White Pass and Yukon Route ordered two pieces of equipment in 1899 to deal with the heavy snow on their rail line. **Check out the Yukon Transportation Museum** to find out what equipment was ordered to help keep the rail lines clear.

9. This steam locomotive has a crown on its front side. What locomotive is it and why does it wear the crown? **Exporail** can help you find the answer!

10. A manually operated railway vehicle, this machine's name sounds prehistoric. **Find the answer from the Toronto Railway Museum here.**
